

# PVS

(Power Vaccine System™)  
PROTECTION OF MOMENTARY INTERRUPTION

- What is PVS (Power Vaccine System)?

PVS is a apparatus to protect your production line from momentary interruption caused by voltage sag, surge, harmonic, transient, and noise. Also, it always supplies ideal sine wave with constant voltage and accurate frequency to your production line. Therefore, PVS gives two benefits to your production line ; clean environment without momentary interruption resulting in damage costly and optimal power condition of your manufacturing line.
